

Reference

Solar Sludge Drying

Conductor Rail 0812 SinglePowerLine

Application
Solar sludge drying plant

Country
France

City
Mortagne au Perche

Project installation date
2011

Representative office
Conductix-Wampfler [F]

Operator
VEOLIA

Technical requirement[s]
Power supply of mobile system for sludge drying with wire guidance

System course
Two linear lines and one curve

Track length [System]
120 m

Product[s]
Conductor Rail, Program 0812 SinglePowerLine

Additional product information
Mechanical structure with kit of standard part (C rail 40 and 63, Slip Ring Assembly and Spring Cable Reel)

Number of poles
5

Current
200 A

Environmental condition[s]
Hot and wet (greenhouse), ammoniac

Additional information
About 10 similar projects between 2009 and 2011
